SUMMARY

I have extensive experience in building reliable web applications using a variety of frameworks and technologies, including React, Node.js, etc. Detail-oriented and organized professional with a strong commitment to quality and efficiency.

EXPERIENCE

Software Engineer (Operations)

Ufinity Pte Ltd

February 2024 – June 2026

- Troubleshoot and resolve production incidents, reducing downtime and improving system reliability.
- Upgraded Java, migrated from Apache Tiles to Thymeleaf and updating Maven dependencies, improving page load speeds and cut maintenance overhead.
- Integrated new products into existing system, ensuring seamless interoperability with upstream/downstream systems.
- Collaborated with cross-functional teams to streamline system flows and refactor legacy code, reducing processing time by ~30% for core calculations and improving long-term maintainability.

Senior Full-stack Web Developer

Findjobs Pte Ltd

August 2019 – September 2023

- Collaborated with cross-functional team to gather requirements and understand the desired functionalities of the websites.
- Developed user-facing features and components using Javascript frameworks like React.
- Developed server-side APIs powering RESTful web services in Node.js, enabling seamless integration with frontend.
- Performed Database Migration (MySQL -> PostgreSQL).
- Used version control system (Git) to manage codebase changes and collaborate effectively with other developers.
- Identified performance bottlenecks and optimised website speed.

Engineering Technician

Applied Materials

November 2017 – January 2019

- Assembled and tested products to ensure products met the required specifications while following production schedule.
- Came up with corrective/preventive actions after diagnosis on production failure or product quality issue with Manufacturing Engineer.
- Participated in continuous improvement projects to implement 5S in the workplace to improve work efficiency and implement order.
- Provide training to other operators on product's assembly/testing process.

Guess the WORDS

[geekharp.github.io/word-guessing-game/](https://github.com/geekharp/word-guessing-game/)

- This minigame was built with HTML, CSS and Javascript for DOM Manipulation Test your ability in guessing scrambled words in the game of SCRAMBLED or play a game of Hangman with friends.

EDUCATION

Software Engineering Immersive

General Assembly • 03/2019–05/2019

- A Technical course that teaches the Skills that enable students to build Full- stack Web Applications.
- Computer Science topics like Algorithms and Data Structures were also covered during the course.

Diploma in Clean Energy

Temasek Polytechnic • 03/2012–04/2015

SKILLS

- React
 - Node.js
 - Ruby on Rails
 - SQL
 - GraphQL
 - Thymeleaf
 - Bootstrap
 - HTML
 - CSS
 - JavaScript
 - TypeScript
 - Java
 - Troubleshooting
 - Git
-
